WORK EXPERIENCE

Node js Developer

Sahar company [01/01/2019 – 01/01/2021]

City: tehran

Country: Iran

- We were a company with 20 developers and developing web sites like online-shop for customers in IRAN I have worked 2 years there as back-end developer.
- The main technologies that I've used are node.js , graphql , MongoDB , PM2 , Git and Docker.

Mathematics teacher secondary school

Physic teacher in Salam High School [01/05/2018 – 01/05/2020]

City: tehran

Country: Iran

- I was teacher in one of the top schools in Tehran as a Physic teacher for 2 years and I had 60 students every year .
- It was good experience to manage my students and help them to grow.
- We were able to increase the GPA by 20% in this course

Telegram Bot Developer

[01/01/2021 – 01/01/2022]

City: tehran

Country: Iran

- I built telegram bot for edit combos in PSN market .Clients uploaded their combo txt file and after 3 minutes my bot editing their combo file automatic and sent them after rename file as {username}.txt
- This bot just accepted txt file limited and was selling monthly license to clients to edit their files as well as original file
- The main technologies that I've used are node.js , Telegraf

fullstack development (focus on backend)

Nasa-Project-Practice [01/01/2022 – 01/03/2022]

City: Antalya

Country: Turkey

- I built a full-stack project where users are able to select their Destination Exoplanet , Rocket type , Mission Name and Launch Date then launch their mission.
- I was able to create Rocket types with parse CSV file in node.js and save it in database before server is running . Upcoming tab in this project is for check launches and delete them Then you can check deleted launches in history tab with red label This project has sound effects too and was able to use PM2 for handle requests well.
- The main technologies that I've used are React , Node.js , MongoDB and Docker .

Pong-game

[01/04/2022 – 01/06/2022]

City: Antalya
Country: Turkey

- I provided a full-stack project (focus on back-end) where 2 users can play Pong game each other with socket.io.
- I was able to create socket.io server on node js and client side which allows users to play each other in rooms. and run express js side by side too. .
- The main technologies that I've used are socket.io , node js , express.js .
